

Work Experience

QA Engineer	NOICE Jakarta, Indonesia	Aug 2025 – Present
NOICE is one of Indonesia's leading audio and video streaming platforms offering podcasts, audiobooks, and film content.		
<ul style="list-style-type: none">Conducted manual and automated testing for Noice Web and Noice Studio using Playwright, integrating CI/CD pipelines to ensure high-quality user experience across platforms.Implemented mobile automation testing using Appium by streamlining regression testing processes for Android and iOS applications and reducing manual effort by 40%.Executed comprehensive manual testing for Noice TV platform by performing smoke, sanity and regression testing.Performed load testing using Locust to evaluate system performance and scalability under various traffic conditions, ensuring optimal application responsiveness.Monitored application performance metrics and system health through Grafana dashboards by proactively identifying potential issues and reducing downtime by 25%.Performed API testing using Postman and Swagger to validate endpoints, payloads, and error handling, maintaining seamless system integration.Executed functional, regression, smoke, and exploratory testing to validate features and identify critical bugs before production release by contributing to a 95% on-time release rate.		

QA Engineer Intern	TransTRACK Bandung, Indonesia	Aug 2024 – Jun 2025
TransTRACK is a fleet management and vehicle tracking solution provider in Indonesia.		
<ul style="list-style-type: none">Designed and executed test cases for web and mobile applications by including functional testing, regression testing, and exploratory testing with 95% coverage rate.Implemented automation testing using Cypress and integrated CI/CD pipelines by reducing manual testing time by 40% and improving QA team process efficiency.Validated 30+ API endpoints using Postman and Newman with integrated automation by ensuring smooth system integration and reducing API error rate by 25%.Led 30+ sprint review sessions and UAT sessions in Agile environment by delivering test results and feedback to development, product, and stakeholder teams with 93% satisfaction rate.Documented test scenarios and bug reports using project management tools by improving team traceability and knowledge sharing by 80%.		

Education

<ul style="list-style-type: none">Associate's Degree In Informatics Engineering, Telkom University, Bandung, Indonesia. Coursework: Database Systems, Web Programming, Software Design, Mobile App Development, Software Testing, Game Development, Artificial Intelligence	2022 – 2025
--	--------------------

Technologies and Languages

- Manual Testing: Test Planning, Test Case Design, Exploratory Testing, Functional Testing, Regression Testing, Smoke Testing, UAT, SIT
- Automation Testing: Cypress, Playwright, Appium, Selenium
- API Testing: Postman, Swagger, REST API Testing, API Automation
- Bug Tracking: Jira, Notion, Trello, Confluence
- Performance Testing: Locust, API Performance Testing, Grafana
- Programming: JavaScript, TypeScript, Kotlin, Python, Java, PHP, C#, HTML, CSS
- Frameworks: Laravel, Node.js, Android, Flutter, Unity
- Database: MySQL, MongoDB, PostgreSQL
- Tools: Git, GitHub, Figma, Microsoft Office, Bitbucket, Jenkins
- Methodology: Agile Scrum, Waterfall, SDLC, STLC
